

Other Recommended Support Tools

So far we have addressed most of the technological skills that students will need in order to work with the ESTRELLAS eLiteracy Kit. Below are four other tools that can benefit your students but that are not required in order to use the kit. Brief videos are available for the following:

- **How to Use Key Board Shortcuts** (for copy & paste)
- **How to Use the Text Layout Tool** (removes extraneous text from a webpage and creates a simplified reading)
- **How to Use the Color Display Tool** (changes the background color of a website)
- **How to Send to Google Docs Tool** (creates a Google Doc out of a webpage)

You can decide when is the best time to teach these, however, you should consider doing this earlier in the implementation. All these skills videos are available in the [Skills](#) links from the ESTRELLAS home page.
