

# Creating a Glossary Strategy

## Video 1 - Step 1

**TEACHER**

Hi! Welcome to Step 1 of the Creating a Glossary strategy.  
Step 1 is: Make a Model...

In this step you'll make a model for your glossary. You will follow the model each time you add words and definitions to your glossary.

To make a model, create a topic in your outline called 'Word'

**STUDENT**

OK, I'm in my outliner, now I need to make a topic... and call it Word...

**TEACHER**

Next, you need to make a subtopic called Definition.

**STUDENT**

OK, now for my subtopic...Definition.

**TEACHER**

If you know another language and think it might help you learn new words in English, then you should add another subtopic called Translation.

**STUDENT**

Hmm, I think it'll be helpful to add another subtopic for a translation of the word too.  
...and I'll title it Translation...

**TEACHER**

Great! You just completed the first step of the Create a Glossary strategy: Make a Model! You will use this model each time you add a word to your glossary.

Now you're ready to move on to Step 2 of the Creating a Glossary strategy – Add Words!
